

Project name	Educational University GATeway to enhance innovative E-learning capabilities, resilience, and new best practices (EDU-GATE)
Description	<p>In response to the negative Covid-19 impacts, it is urgent to support digital transformation plans at all levels of educational online activities and support new inclusive digital pedagogical methods and skills for the adoption of digital tools addressed to students, including the participants with disabilities. This to create the condition of a more EU integrated strategy to prepare a proposal for a Council Recommendation on the enabling factors for successful digital education by 2022, which imply a real digital revolution in educational processes and learning skills.</p> <p>Digital technologies are becoming very relevant at the EU level for teachers and students. However, the current limitations on the movement of people and teaching hours may restrict this type of delivering. For this reason, EDU-GATE project will provide a detailed European multi-sectoral analysis indicating the comparison of the current situation of teaching digitalization together with a transversal needs' analysis. These in-depth multi-countries researches will be carried out for the determination of innovative approaches and concrete supporting tools for post-graduated and master learning needs for educational institutions. A detailed analysis of digital educational requirements will be also produced, providing cutting-edge tools to foster innovation and value creation in educational activities and academic communities building. After the already done preliminary academic Partners needs' analyses, a common study will be carried out for determination of new requirements, determining new key and transversal competences, reflecting them to concrete and open resilient educational programs, and sharing at European level effective tools in an integrated platform and infrastructure.</p>
Project type	International
Project duration	2021-2023
Project webpage	https://edugate-project.eu/
