

Project Name	DIGI-YOUTH KIT 2023-1-FR02-KA220-YOU-000159986
Description	The most relevant priority of the project is increasing the quality, innovation and recognition of youth work. Our project's main focus is on youth centers, whose personnel, members and representatives are all involved in youth work, organizing or supporting various activities with/for youth. Given this, we believe that through this project we will bring innovation and increase the quality of youth work in a direct way by planning to support the development of some main key competencies of actors directly involved in youth work, and working in youth centers. We plan, through this project to support the professionalization of the work of youth workers by realizing open educational resources in the form of online training courses, a practical guide & an e-game to support the training of youth workers who would like to develop specific competencies related to the job of a youth center coordinator and/or animator.
	 
Project type	International
