

**PROJECTS FUNDED BY THE UNIVERSITY RESEARCH
FUND IN THE ACADEMIC YEAR 2019**

Project Title	Faculty
Creating a Multi-step Approach for Implementation of the Process of Synthesis	Faculty of Computer Science and Engineering
Design and Manufacture of a Low- and Medium-Power Wind Turbine	Faculty of Computer Science and Engineering
A Study of the Operational Reliability of Variable Frequency Drives	Faculty of Computer Science and Engineering
Preparation of a Methodological Guide for Conducting Feasibility Studies for Projects Involving the Transformation of the Energy of Sea Waves and Currents	Faculty of Computer Science and Engineering
Training of Lecturers and Students from the Faculties of Computer Science and Engineering and Business Studies on How to Conduct Modern Research Using Up-to-date Software Engineering Products	Faculty of Computer Science and Engineering Faculty of Business Studies
Measuring the Gross National Happiness Index	Faculty of Business Studies
A Laboratory Model of a High-Performance Resilient Computer Cluster	Faculty of Computer Science and Engineering
A Study of the Legal Framework for Protection of the Maritime Interests of EU and Related Activities	Faculty of Legal Studies
